ĐỀ SỐ 2: LEVEL TRUNG BÌNH (SKIMMING & SCANNING)

Time limit: 10 minutes

Text: The Great Barrier Reef

The Great Barrier Reef is the world's largest coral reef system, composed of over 2,900 individual reefs and 900 islands stretching for over 2,300 kilometers. It is located in the Coral Sea, off the coast of Queensland, Australia. This reef is so large that it can be seen from outer space and is the world's biggest single structure made by living organisms.

However, the reef is facing serious threats. Climate change is the most significant danger, as rising ocean temperatures lead to coral bleaching. This happens when corals lose the algae that give them color and nutrients. Since 1995, the reef has lost more than half of its coral cover. Scientists are working hard to develop "super corals" that can survive warmer waters, but they warn that global action to reduce carbon emissions is the only long-term solution.

Questions: 6. (Skimming) What is the main purpose of this text?

- A. To explain how to travel to Australia.
 - B. To describe the reef and the dangers it faces.
 - C. To teach how to grow "super corals."
 - 7. (Scanning) How many individual reefs make up the system?
 - 8. (Scanning) Where exactly is the reef located?
 - 9. (Scanning) What is the main cause of coral bleaching?
 - 10. (Scanning) Since what year has the reef lost half of its coral?

Text: The Future of Work: Remote vs. Office

[A] Remote work was once a rare perk, but the 2020 pandemic turned it into a global standard. Supporters argue that working from home increases productivity and saves hours of commuting time. Companies also benefit by reducing their expenses on large office spaces and electricity.

[B] On the other hand, critics point out the "loneliness epidemic" among remote workers. Without face-to-face interaction, team bonding becomes difficult, and the line between professional and personal life often blurs. This can lead to burnout as employees feel they are "always on."

[C] Consequently, the "Hybrid Model" is emerging as the preferred choice. This involves spending 2-3 days in the office for meetings and social connection, while working from home for deep-focus tasks. It aims to balance the flexibility of remote work with the social benefits of the office.

Questions: 11. (Skimming) Match the headings to the paragraphs:

- i. The Middle Ground: Hybrid Solutions
- ii. Advantages for Employees and Employers
- iii. The Psychological and Social Drawbacks

12. (Scanning) According to paragraph B, why is team bonding difficult?

13. (Scanning) How many days do employees typically spend in the office in a "Hybrid Model"?
